20084N

Rechargeable LED Slimline Work Light

February 2023

The Alemlube 20084N Rechargeable LED Slimline Work Light represents the latest technology providing the ultimate light source for illuminating work spaces in automotive workshops, production facilities, marine & recreation activities and around the home.

The 20084N utilises LED technology to provide you with incredible brightness via 50 LED's with energy efficiency when creating the ideal working conditions.

The flexible attachment clamps can extend the work light from a 117cm minimum to a maximum of 190cm in length ensuring it can be used on a large range of makes and models of vehicles.

The 20084N has three light modes, low, mid and high with luminosity of 500lm, 1000lm and 2000lm respectively and run times of 9 hours, 6 hours and 3 hours respectively.

Simply charge the 20084N LED Slimline Work Light with the supplied 1m type C USB charging cable. The battery can be charged independently of the light via an inbuilt USB input.

The shatterproof polycarbonate lens combined with LED technology ensures longevity of life in tough workshop environments.

SPECIFICATIONS, FEATURES & BENEFITS

- 50 energy efficient LED's
- 3 light modes
 - LOW: 500lm, 9 hours run time
 - MID: 1000lm, 6 hours run time
 - HIGH: 2000lm, 3 hours run time
- 3 LED battery level indicator
- Battery with inbuilt USB charging input
- 360° rotational light bar
- Extendable from 117cm to 190cm
- Rubber coated hooks
