AA46001N Oil Filter Crusher with Stand

September 2022

The AA46001N Oil Filter Crusher with Stand has been designed and engineered to reduce your recycling costs and take a positive step towards an environmentally friendly workshop.

The AA46001N crushes standard car filters in less than 30 seconds at an operating pressure of 120psi (8bar), while removing up to 85% of waste oil. Filters can be crushed to less than 1/6th of their original size utilising it's powerful 20 tonnes of crushing pressure.

The AA46001N Oil Filter Crusher with Stand operates on normal workshop compressed air @ 90-120psi working pressure making it perfect for any workshop. While also having the added bonus of the unique safety door, ensuring the device will not operate unless safely secured.

The high stand has been designed and manufactured for oil drainage accommodating a waste oil drum within the frame of the AA46001N.

SPECIFICATIONS, FEATURES AND BENEFITS

- Compact design suits workshops of all sizes
- Crushing time based on 10 CFM at 120psi (8bar) is 30 seconds
- Air pressure of 90 - 120psi
- Removes up to 85% of waste oil and crushes the filter to less than 1/6th of its original size
- Creates up to 20 tonnes of crushing pressure
- Suits filters with maximum height of 225mm and maximum width of 125mm
- Operates on normal workshop compressed air
- Unique safety door ensures the device will not operate unless secured
- Dimensions: 400mm(D) x 560mm(W) x 1629mm(H)
